

ZINE EDDINE LOUATI

Bizerte, Tunisia | zineeddinelouati.2000@gmail.com | LinkedIn | GitHub | Portfolio
Full Stack Developer specializing in Data Engineering & AI/ML Integration
Open to relocation to France

PROFILE

Full Stack Developer with a strong backend and API foundation, progressively specializing in data engineering and Azure-based data platforms. Hands-on experience building enterprise systems with Clean Architecture (.NET/Blazor, Azure AD, Microsoft Graph, SharePoint), ETL pipelines (n8n/OCR), and real-time stream processing (Apache Kafka, Apache Spark). Currently deepening Azure Data Engineering skills (Data Factory, Databricks, Synapse) ahead of the Microsoft DP-203 certification.

PROFESSIONAL EXPERIENCE

Dynamix Services

Full Stack ERP Developer

Bizerte, Tunisia

Jun 2024 – Present

- Architected a modular Clean Architecture Quality Portal (.NET/Blazor) for multi-plant certification management with Azure AD group-based authorization
- Integrated Microsoft Graph API and SharePoint for automatic certificate document storage; Wolverine transactional outbox with EF Core for reliable domain events
- Built an n8n + OCR data pipeline (extraction → transformation → structured storage), reducing manual data entry by 40%; JWT/RBAC across ERP modules serving 50+ users

Martelli Tunisia

Full Stack Developer (Internship)

Bizerte, Tunisia

Jul 2023 – May 2024

- Developed a real-time inventory management application with WebSocket-based live updates
- Built and secured backend services and APIs with JWT authentication
- Containerized services with Docker for consistent development and production environments

Digit Kakushin Soft

Mobile Developer (Internship)

Sfax, Tunisia

Feb – Jun 2023

- Built a cross-platform leave management app (Flutter) used by 100+ employees, with push notifications (99% delivery rate)
- Integrated the mobile frontend with Spring Boot backend services via REST APIs

FEATURED PROJECTS

Quality Portal — Enterprise Certification Platform | .NET, Blazor Server, EF Core, Wolverine, Azure AD

- Modular Clean Architecture platform for industrial plant certifications, users, and notifications across multiple sites
- Azure AD group-based roles with live permission sync; Microsoft Graph + SharePoint for per-plant certificate document storage
- Wolverine transactional outbox with EF Core; Hangfire-scheduled expiration alerts and configurable notification recipients

HR Management Platform | React, Node.js, JWT, RBAC, n8n, OCR

- Multi-role enterprise platform: employee lifecycle, leave, fleet, licenses, and collaborative task workflows for 50+ users
- n8n OCR invoice pipeline (PDF/images → CSV → database) cutting manual processing by 40%; real-time notifications and OCR document archive

Esport Big Data Pipeline | Apache Kafka, Apache Spark, Docker, Python, Streamlit

- Production-oriented streaming analytics platform for esports data, built on the Riot Games API
- Real-time ingestion and processing with Kafka and Spark Structured Streaming; live Streamlit monitoring; modular Docker deployment

Biometric Attendance System | FastAPI, React, MongoDB, C# SDK, Docker

- Full-stack attendance system with fingerprint hardware via C# SDK; real-time sync between terminals and central database
- Admin analytics dashboard with CSV/Excel export; containerized multi-service deployment (React, FastAPI, C# desktop service)

Additional projects — AgriSmart AI yield prediction, OCT medical imaging, real-time inventory, Flutter leave app, Fintness — available on the portfolio and GitHub.

EDUCATION

Iteam University

Computer Engineering — Big Data & Business Intelligence

Tunis, Tunisia
Sept 2023 – June 2026

- Big data processing frameworks: Hadoop, Apache Spark, PySpark
- Data platform tools: Databricks Monitoring: Grafana
- Data modeling, warehousing, and business intelligence fundamentals

ISIMSF

Bachelor's degree in Computer Science and Multimedia

Sfax, Tunisia
Sept 2020 – June 2023

- Core skills: JEE, Hadoop, Cloud Computing, Big Data, C, Unity, Adobe Illustrator, Scrum, AI

TECHNICAL SKILLS

Data & Cloud: Apache Spark, PySpark, Hadoop, Databricks, Apache Kafka, Grafana, Azure Data Factory (Learning), Azure Synapse (Learning)

Enterprise & .NET: .NET, Blazor Server, EF Core, Wolverine, Hangfire, Azure AD, Microsoft Graph API, SharePoint, Azure DevOps

Databases: MongoDB, SQL Server

Backend: Node.js/Express, FastAPI, Flask, Spring Boot

Frontend & Mobile: React, React Native, Flutter, Blazor

AI/ML: TensorFlow/Keras, PyTorch, XGBoost, CNN, ResNet18

DevOps: Docker, CI/CD, GitHub Actions, JWT/RBAC

LANGUAGES

French (Fluent) • English (Professional) • Arabic (Native)
